Profile

Full-stack developer with experience building scalable, production-ready web applications using Next.js, React, Node.js, and TypeScript. Focused on clean UI/UX, efficient API design, and delivering real-world products with modern web technologies.

Education

Vidyavardhini's College of Engineering and Technology

2022 – 2026 (pursuing)

B.E. Information Technology (IT) 4th year

CGPA: 8 / 10

Skills

Frontend: Next.js, React, TypeScript, ShadCN, TailwindCSS, Zustand

Backend: Next.js, Express.js, Node.js, FastAPI, Python (Currently exploring)

Database and ORM: PostgreSQL, Prisma, MongoDB, Mongoose

Modern Tools and Technologies: Docker, Vercel AI SDK, Git, Stripe

Experience

Full Stack Developer

May 2025 – Present

Arkimals (Remote)

Tools Used: Waves-dapp, Swagger, Signer, Keeper Wallet, Vite

- Refactored a large codebase across 5+ microservices, improving maintainability and reducing technical debt by 30%.
- Reduced average page load time by up to 40% by implementing data caching and prefetching with React Query.
- Enhanced UI/UX with AI tools like Cursor and Claude, leading to a 25% boost in user engagement metrics.
- Authored 50+ automated test cases for the image service using Supertest and Jest, increasing test coverage to 85%.

Frontend Developer

Feb 2025 – May 2025

Neotix Lab Private Limited (Remote)

Tools Used: Next.js, TypeScript, NextUI

- Developed the frontend for Raffl, a web3 platform enabling users to create raffles, write blogs, and design quests, resulting in a 40% increase in user participation.
- Implemented an intuitive UX that improved user satisfaction scores by 30% through streamlined navigation and interactive components.
- Designed an attractive user interface that boosted user engagement and increased average session duration by 25%.

Projects

ForgeCommerce | *Next.js, TypeScript, Prisma, Drizzle, PostgreSQL, Stripe*

March 2024 – July 2024

- ForgeCommerce is a headless CMS webapp where the user can create, update or delete their necessary data for making cool e-commerce stores with built-in payment processing and minimalistic UI
- Next.js, TypeScript, PostgreSQL, Prisma, Stripe, ShadCN UI, TailwindCSS.
- Live Link:- <https://forge-commerce.vercel.app>

ForgeStore | *Next.js, TypeScript, Stripe, DaisyUI*

August 2024 - Ongoing

- The second part of the project where the data displaying on the e-commerce store will be coming from the ecomm-dashboard-store which is working as an API and using stripe for checking out
- Next.js, TypeScript, ForgeCommerce API, Stripe, Daisy UI, TailwindCSS.
- Live Link:- <https://forge-ecomm-store.vercel.app>

AI-Companion-Builder | *TypeScript, Next.js, AI SDK*

Jan 2024 – March 2024

- AI-Companion is an innovative software that lets you create your own custom AI models of people you admire, like actors or celebrities. It is a tool for creating personalized artificial intelligence companions based on your favorite individuals
- Next.js, PostgreSQL(Supabase), Prisma, TypeScript, ShadCN/TailwindCSS, Redis, OpenAI for embeddings used.
- Live Link:- <https://ai-companion-builder.vercel.app>

Awards

- Open source contributor ([ShadCN-form-builder](#)). Contributed to a dynamic form-building tool, enabling users to create forms with validation within seconds while delivering high-quality, clean, and maintainable code.
